

Around the Nature Center

Follow the clues to six different spots around the Nature Center. Each location has a post with a rubbing plate. Use a crayon or pencil to make a rubbing on this sheet. Collect all six rubbings. If you liked this activity think about natural items you could use to make a rubbing. Leaves and bark are just a couple ideas.

You'll find me in a place where plants have to grow.
A fair maiden watches me flutter to and fro.

Take a peek through a hole in the fence,
to see our feathered friends at their best.

Take a hike over a long suspending bridge.
You'll find my natural beauty resting near a ridge

Walk along the tall prairie grass,
to find a pioneers home at last.

This is where I spend part of my day,
watching children naturally play.

An elk you may see as you walk by me.
Take a look low, to see me swimming below.
